

The set of three

Basic-RESTORE

- for acidal and inflamed stomach and intestine
- for high cholesterol
- with klinoptinolith and Vit D
- Refilling your mineral batteries
- Klinoptinolith for deacidification & detox of the intestine
- Delivers important minerals over the intestine

empf. VK

3 Mon. 480 g
59,90 €

Basic-GOLD Jointfood

empf. VK

1 Mon.-Kur 150 g
69,90 €

- Inflamed joints
- Early aged skin
- Depression, ductless gland
- High cholesterol
- Supporting the bones + stabilisation

Basic-DIREKT, for basic drinking water

- against heartburn and reflux
- against athrosis, gout and rheumatism
- Mineral supplier directly into the blood
- Deacidification joints + skin
- supporting healing processes
- stopping inflammations

empf. VK

3 Mon.-Pack 150 g
29,90 €

✓ FITTER ✓ BEWEGLICHER ✓ VITALER ✓ GESÜNDER

1 st. professionell HEALTHSUPPORT

... with controllable results

the regeneration cure for at home

✓ measurable healthier
✓ biologically younger
✓ checkable

Highly recommended for overacidosis ...

- because of stress, onesided diet, overweight
- heartburn, acid reflux, inflammation in stomach & intestine
- high uric acid and lactate level
- high cholesterol and inflammation of joints
- with bad blood stats, allergies

The positive effect of this cure is checkable in a big bloodtest!

What's important when you reach your 40's?

With the use of vital substances and radical catchers reaching deacidification and detoxication, your health will benefit and health issues that come with age will be prevented.

Did you know that there is a simple solution for many things, but it's not public yet?

Here is one, a solution from a privately financed research project. The sensational result first: Most of the health issues coming with age are the picture of many years long of overacidosis. Overacidosis and leaching are two different sides of a coin.

How can I see that I have overacidosis?

First things you can see are: reflux, dry eyes, inflammation in the stomach and intestine, high cholesterol, tiredness, pimples, weak nails, and much more..

With chronical overacidosis the surplus of stomach acid is creating new problems, like the „leaking gut“. We see tissue damage, inflammations and ulcerations. Lactic acid is producing pain in the muscles, and uric acid and the crystals in the joints are producing more inflammations that are painful.

Gout in the big toe joint and fingerjoints, arthrosis, rheumatism and osteoporosis are direct consequences of overacidosis or the lack of minerals, which could provide a balance. Another result is a high blood pressure and high cholesterol.

1. professional health support with controllable results

The presented solution is based on a supply of different essential mineral types and other vital supplements, how they appear in nature. What type of minerals are important was never questioned and was part of my observation.

Every mineral has a different impact area.

One type can solve the problem with chrystals in your joints, another dissolves the acid in the intestine and another is filling up the bicarbonate buffer. Those are the three most important problem areas.

New foundation is offering a solution:

Back in the old days the scientific society assumed overacidosis is not possible because the bicarbonate puffer that neutralizes overacidosis in the blood are endless. This assumption is incorrect, because those puffer systems are running out fast and need to be reloaded. This reloading process takes minerals out of natural mineral batteries like the skin, hair, joints and bones. Missing basic minerals in the blood are causing tissue damage, cauterizations and inflammations, because the stomach mucosal lining and the intestinal mucosa cannot use it's protection against the strong acids.

I call this phenomenon „overacidosis-syndrom“. Through demineralization you slowly become sick and age earlier.

Development of „the set of three“

After 17 years of privately financed research I found an answer: There is an easy and efficient solution which can solve 85% of the above listed problems. A solution that shows a connection between the origin of the aging processes, like high cholesterol, joint problems, osteoporosis, problems with the moveability and and high blood pressure with the lack of important vital substance. This realization helped to develop an easy and effective strategy against the problem.

Yes, the avoidance of a lack of minerals in maturity decides if you get ill or stay fit. This is easily achievable with „the set of three“, a combination of three different supplements, that you can use as a cure at home.

Most of the users in the last couple of years report unbelievable changes in their living quality. The positive impact can also be seen in your own blood picture, metabolism screening or with a darkfield diagnosis.

The three different examination methods prove that the results are showing a biological rejuvenation of the whole body. This can be seen in the skin, eyes, bones through CRP, cholesterol and liverstats.

The personal wow effect when you have more energy and get positive feedback by your surrounding people, who see the positive optical change when you haven't seen each other for a while.

So why not start to decrease your overacidosis, to detox and increase those important vital substances.
